--More Helpful Information--

New Permit Language affecting all NPDES and Pretreatment facilities:

Monitoring results obtained during the previous reporting period shall be summarized and reported on a Discharge Monitoring Report (DMR). DMRs submitted after December 20, 2016, shall be submitted electronically using the MDEQ NetDMR system.

Important Reminder:

MDEQ is having trouble with permittees submitting their new permit application on time, which is due 6 months before expiration of current permit. All major facilities (≥ 1 MGD flow) and minor toxic pretreatment must begin sampling at least 2 years before new application due date, at 2.5 years into the current permit. Small municipal domestic (<1 MGD) must begin sampling a year before due or at the 3.5 year after permit issuance mark (also 18 months before permit expiration).

Start	1 year in	1.5 years in	2 years in	2.5years in	3 years in	3.5 years in	4 years in	4.5 years in	5 years
Issue Permit				Start sampling if Major or Minor Toxic		Start sampling if small municipal domestic	Small commercial begin app, no sampling required	ALL Permit Applications Due	Permit Expiration

The courses below are offered free by MSRWA (MS Rural Water Assn), and typically, there will be 2 DEQ Sponsored hours and 4 Non-DEQ Sponsored hours offered at each class. Half the hours needed for renewal can be Non-DEQ Sponsored hours. Classes, dates, and locations may change; please keep up to date with www.msrrwa.org. Please email agraham@msrrwa.org north region or rparker@msrrwa.org south region for additional information on classes.
